

BUSINESS RESILIENCE BREAKFAST ADDRESS with Brigadier (Rtd) Nigel Hall

With acute pressures on government and corporate finances, what action can you cost effectively take to deliver a safer and more resilient business environment?

How is the nation's risk profile changing, and what should your business do to prepare, plan and adapt to a rapidly changing risk environment?

Join us as we explore how you can target investment to deal effectively with the evolving risk landscape.

If you have functional responsibility in this area, this seminar will offer deeper insight into business resilience and the security context.

Our keynote speaker for the morning will be Brigadier (Rtd) Nigel Hall. With his unique background, he is ideally placed to link Government security and resilience activity with everyday survival in a UK Corporate.

About our panel

Nigel Hall, Brigadier (Retired) - Keynote Speaker

Recently retired from the British Army, Nigel has extensive counter-terrorist, public order, and joint civil-military operational experience. He held demanding UK Ministry of Defence Central Staff appointments, and has considerable international organisation and major cross-government mission experience at United Nations HQ New York and NATO HQ Brussels. Nigel is special adviser to several business corporations, the Humanitarian Futures Programme, King's College London, and Army member Transparency International (UK). His recent publications include an Op-ed on global security in the Financial Times and Chatham House World Today, RUSI.Org, and Guardian articles on UK's Strategic Defence and Security Review. Nigel has spoken in Washington and Europe on various aspects of 21st Century security.

Chris Baker, Director of Intradependency Ltd

Chris is a widely respected risk analysis and management consultant specialising in the use of innovative Dependency Modelling techniques. Intradependency deliver software solutions that uniquely manage complex risk scenarios in real-time to underpin the resilience of Business Corporations and Critical National Infrastructure.

David Williams, Director of TrustedIA Ltd

David is a senior CLAS accredited Information Assurance Consultant with extensive experience in setting Enterprise Security strategies and architectures, security policies, risk assessments, RMADS, security controls and Incident Management processes. TrustedIA are independent Information Assurance experts.
